SUMMARY

Product Designer with 7 years of experience, 6 of them in product design and UI/UX, and I also code the front-end. I take projects from research to developer handoff: user flows, wireframes, Figma prototypes and design systems. I have worked on gamification, retention and mobile products, on my own and in squads with product and developers, and I use AI to move faster without losing the human side of the decisions.

EXPERIENCE

Product Designer | Lucky Gaming Oct 2025 - Oct 2026

Teresina, Brazil | Hybrid

- Stakeholders trusted my work and my game design background to research, plan, design and execute the gamification of the 4Play, Pagol and 123 platforms. I owned it end to end (UI/UX, product design and code), in a squad with product and developers.
- Challenge: low adoption of and engagement with gamification, churn across several acquisition screens, low first-time deposits (FTD) and falling retention.
- Solution: rewards, prizes and consistency as the base of the gamification, with clear, direct communication for each audience, segmented CRM content and campaigns, A/B tests, new themed dynamics every month, and light screens that load fast and are easy to understand.
- Gamification results: monthly mission completions grew from 303K to 3.4M, mini-game engagement rose 1,471% and Pagol active users went from 37.5K to 73.6K. On 4Play, virtual economy points spent grew 1,110%.
- Led the 4Play redesign, presented as a reference in meetings in Europe, Cyprus and Latin America, and helped direct Pagol's, with a focus on mobile and the apps. Built 123 mobile-first (home, casino, live casino and side menu).
- Built the design systems for all 3 brands in Figma and the loyalty club from scratch (missions, store, tournaments, mini-games and the loyalty hub), with 12+ Liquid sections on Smartico that I adjusted regularly.
- User-behavior studies, CTA and copy tests (GA4 and Microsoft Clarity) and accessibility improvements.
- Worked daily with international front-end teams, from handoff to final implementation, and used AI (Claude with the Figma MCP, Figma AI, ChatGPT) to speed up design and handoff.
- Built a multi-brand Email Builder (Next.js, TypeScript, Supabase, Tailwind). Email output grew 6x and broken emails dropped to almost zero.
- Adapted the 4Play site and loyalty hub to Spanish. It is live in Costa Rica and was adapted for Guatemala and Chile.

Product Designer & Executive Producer | Deadpixel Studios Feb 2024 - Jan 2026

Remote

- Product design and UI/UX for the games: systems, interfaces and localization into English and Spanish.
- Executive-produced three Very Positive Steam launches (84%-91%). Machick 2 sold 10,000+ copies in its first two weeks and peaked at 700+ concurrent players, and Bees vs Zombees was selected for Panorama Brasil at Gamescom Latam 2025. Coordinated launches with publishers in Brazil and China.

Lead Product Designer & UI/UX | Infatec Soluções Tecnológicas May 2022 - Apr 2025

Teresina, Brazil | On-site | Designer until Sep 2022

- Led 4 designers delivering 13+ mobile, web and enterprise products; company contracts grew 8% in the period.
- Owned research, user flows, wireframes, design systems, prototyping and developer handoff; mentored junior designers.
- Introduced design KPIs and led the migration from Trello to Monday.com.

SELECTED PROJECTS

- Tinker and Vantle: concept landing pages I designed end to end, with a UX roadmap, wireframes in Figma, a low-fi prototype and an interactive final page. victorvk.com
- Multi-brand Email Builder demo: Next.js and TypeScript, three brands driven by design tokens, no duplicated templates. github.com/Victorvkdev/multi-brand-email-builder

SKILLS

Product Design: End-to-end UX/UI, mobile and responsive web, user research, interviews, usability testing, user flows, information architecture, personas, sitemaps, interaction design, wireframing, prototyping, A/B testing, onboarding, conversion, accessibility (WCAG 2.1), localization

Design Systems: Figma (variables, components), design tokens, component libraries, multi-brand theming, documentation, developer handoff

Design & Research Tools: Figma, Adobe Creative Cloud, Miro, Maze, Google Analytics 4, Microsoft Clarity

Collaboration: Scrum, Kanban and Waterfall, squads with product and developers, KPI planning, Jira, Linear, Monday.com, Trello

Product & Data: Gamification, retention, segmentation and CRM (Smartico), CMS, A/B testing, product metrics

Front-end: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Liquid, Git, GitHub

AI & LLMs: Claude Code, Claude with the Figma MCP, Figma AI, Cursor, ChatGPT, Gemini, v0, LangChain agents, prompt engineering, AI-assisted prototyping

EDUCATION & CERTIFICATIONS

FIAP: Associate Degree in Digital Games (2020-2022)

UNIFAEL: Postgraduate Specialization in Marketing and Social Media (in progress)

EF SET English Certificate C1 (2025) | Google Analytics 4 (2025) | HubSpot Marketing (2025) | Foundations of Project Management, Google | Google UX Design (in progress)

LANGUAGES

Portuguese: Native | English: C1, EF SET certified | Spanish: Intermediate (B1-B2) | French: Basic
